# GCSE Mathematics (Linear) 

Foundation Tier Paper 2

Mark scheme

43652F
November 2015

Version 1.0 Final.

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts: alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available from aqa.org.uk

## Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

| M | Method marks are awarded for a correct method which could lead <br> to a correct answer. |
| :--- | :--- |
| A | Accuracy marks are awarded when following on from a correct <br> method. It is not necessary to always see the method. This can be <br> implied. |
| B | Marks awarded independent of method. |
| ft | Follow through marks. Marks awarded for correct working <br> following a mistake in an earlier step. |
| SC | Special case. Marks awarded for a common misinterpretation <br> which has some mathematical worth. |
| M dep method mark dependent on a previous method mark being |  |
| awarded. |  |$\quad$| A mark that can only be awarded if a previous independent mark |
| :--- |
| has been awarded. |

3.14... Accept answers which begin 3.14 e.g. 3.14, 3.142, 3.1416

Q Marks awarded for quality of written communication
Use of brackets It is not necessary to see the bracketed work to award the marks.

Examiners should consistently apply the following principles

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a candidate has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the candidate. In cases where there is no doubt that the answer has come from incorrect working then the candidate should be penalised.

## Questions which ask candidates to show working

Instructions on marking will be given but usually marks are not awarded to candidates who show no working.

## Questions which do not ask candidates to show working

As a general principle, a correct response is awarded full marks.

## Misread or miscopy

Candidates often copy values from a question incorrectly. If the examiner thinks that the candidate has made a genuine misread, then only the accuracy marks (A or B marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

## Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

## Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

## Work not replaced

Erased or crossed out work that is still legible should be marked.

## Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

## Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

## Paper 2 Foundation Tier

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| $\mathbf{1 ( a )}$ | $270^{\circ}$ | B 1 |  |
| :--- | :--- | :--- | :--- |

| 1(b) | South-West | B1 |  |
| :--- | :--- | :--- | :--- |

| 2(a) | kilometres and miles | B2 | B1 each |
| :--- | :--- | :--- | :--- |

2(b) | grams and ounces | B2 | B1 each |
| :--- | :--- | :--- | :--- |

2(c) 2000 ml and 1.5 litres $\quad$ B2 $\quad$ B1 each

| 3 3(a) | $12 \times 4+8$ <br> or 48 seen | M1 |  |
| :--- | :--- | :---: | :--- |
|  | 56 | A1 |  |

| $\mathbf{3 ( b )}$ | $20 \div 3.5$ or $5.7(\ldots)$ or 6 <br> or $5 \times 3.5=17.5$ <br> or $6 \times 3.5=21$ <br> or $[5,6] \times 3.5$ correctly evaluated | M1 | ee |
| :--- | :--- | :---: | :--- |
|  | A1 |  |  |
|  | $5.6 \times 3.5=19.6$ |  |  |
| $5.8 \times 3.5=20.3$ |  |  |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 4(a) | 35 or 45 or 40 | M1 |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & 35 \times 2 \text { or } 70 \\ & \text { or } 45 \times 2 \text { or } 90 \\ & \text { or } 40 \times 2 \text { or } 80 \\ & \text { or } 35+45+40 \\ & \text { or } 120 \end{aligned}$ | M1dep |  |  |
|  | $\begin{aligned} & 35 \times 2+45 \times 2+40 \times 2 \\ & \text { or } 70+90+80 \\ & \text { or } 120 \times 2 \end{aligned}$ | M1dep |  |  |
|  | 240 | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | $35+45+40 \times 2=240$ (recovered) |  |  | M1M1M1A1 |
|  | $\begin{aligned} & 40+45+35 \times 2=155 \\ & 45+40+35 \times 2=155 \\ & 35+45+40 \times 2=160 \\ & 45+35+40 \times 2=160 \\ & 35+40+45 \times 2=165 \\ & 40+35+45 \times 2=165 \end{aligned}$ |  |  | M1M1M1A0 <br> M1M1M1A0 <br> M1M1M1A0 <br> M1M1M1A0 <br> M1M1M1A0 <br> M1M1M1A0 |
|  | Any of the above 6 without an answer scores 2 |  |  | M1M1M0A0 |
|  | 155 or 160 or 165 with no working |  |  | M0 |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 4(b) | 40 <br> or two numbers that add up to 65 | B1 |  |
| :---: | :---: | :---: | :---: |
|  | 65 - their 40 or 25 <br> or 6.5 symbols in total | B1 |  |
|  | 4 symbols drawn for Thursday <br> or 2.5 symbols drawn for Friday | B1 |  |
|  | Fully correct pictogram ie 4 symbols drawn for Thursday and 2.5 symbols drawn for Friday | B1 |  |
|  | Additional Guidance |  |  |
|  | The number of symbols implies the number, eg 4 symbols implies 40 $2 ½$ symbols implies 25 |  |  |
|  | Fully correct pictogram with no working |  | B1B1B1B1 |
|  | $61 / 2$ symbols in total with no other working |  | B1B1B0B0 |
|  | 4 symbols drawn for Thursday with no other working |  | B1B0B1B0 |
|  | 2.5 symbols for Friday with no other working |  | B0B1B1B0 |
|  | Accept a different symbol if key is redefined but candidates cannot score the fourth mark if a different symbol is used and key is not redefined |  |  |
|  | Half circle can be with or without a diameter and can be in any orientation |  |  |

| 5(a) | 1357 | B1 |  |
| :--- | :--- | :--- | :--- |

5(b) $73 \div 5$
B1

| Q | Answer $\quad$ Mark |  | Comments |  |
| :---: | :---: | :---: | :---: | :---: |
| 5(c) | $53 \times 7=371$ | B2 | B1 for a correct calculation using 3, 5 and 7 or for $53 \times 7$ <br> or 371 |  |
|  | Additional Guidance |  |  |  |
|  | $35 \times 7=245$ |  |  | B1 |
|  | $37 \times 5=185$ |  |  | B1 |
|  | $57 \times 3=171$ |  |  | B1 |
|  | $75 \times 3=225$ |  |  | B1 |
|  | $73 \times 5=365$ |  |  | B1 |
|  | For B2 correct answer must be in the boxes, or clearly identified |  |  |  |
|  | For B1 accept any correct calculation (ignore incorrect calculations) using 3,5 and 7 (does not have to be in the boxes) |  |  |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| $7(a)$ | $[8,9]$ | B1 |  |
| :--- | :--- | :--- | :--- |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

|  | Any correct reading | M1 | eg <br> tolerance as below <br> $1 \mathrm{~m} / \mathrm{s} \rightarrow[3,5] \mathrm{km} / \mathrm{h}$ <br> $2 \mathrm{~m} / \mathrm{s} \rightarrow[6,8] \mathrm{km} / \mathrm{h}$ <br> $3 \mathrm{~m} / \mathrm{s} \rightarrow[10,12] \mathrm{km} / \mathrm{h}$ <br> $4 \mathrm{~m} / \mathrm{s} \rightarrow[14,16] \mathrm{km} / \mathrm{h}$ <br> $5 \mathrm{~m} / \mathrm{s} \rightarrow[17,19] \mathrm{km} / \mathrm{h}$ <br> $6 \mathrm{~m} / \mathrm{s} \rightarrow[20,22] \mathrm{km} / \mathrm{h}$ <br> $10 \mathrm{~m} / \mathrm{s} \rightarrow[35,37] \mathrm{km} / \mathrm{h}$ <br> $12 \mathrm{~m} / \mathrm{s} \rightarrow[42,44] \mathrm{km} / \mathrm{h}$ <br> $15 \mathrm{~m} / \mathrm{s} \rightarrow[53,55] \mathrm{km} / \mathrm{h}$ <br> $20 \mathrm{~m} / \mathrm{s} \rightarrow[70,72] \mathrm{km} / \mathrm{h}$ <br> $25 \mathrm{~m} / \mathrm{s} \rightarrow[89,91] \mathrm{km} / \mathrm{h}$ <br> allow $30 \mathrm{~m} / \mathrm{s} \rightarrow[107,109] \mathrm{km} / \mathrm{h}$ |
| :---: | :---: | :---: | :---: |
| 7(b) | their value $\times$ scale factor <br> or a combination with a total of $60 \mathrm{~m} / \mathrm{s}$ | M1dep | $\begin{aligned} & e g \\ & {[3,5] \times 60} \\ & {[6,8] \times 30} \\ & {[10,12] \times 20} \\ & {[14,16] \times 15} \\ & {[17,19] \times 12} \\ & {[20,22] \times 10} \\ & {[35,37] \times 6} \\ & {[42,44] \times 5} \\ & {[53,55] \times 4} \\ & {[70,72] \times 3} \\ & {[107,109] \times 2} \\ & \\ & 25+25+10=[89,91]+[89,91]+[35,37] \\ & 15+20+25=[53,55]+[70,72]+[89,91] \end{aligned}$ |
|  | [200, 240] with no readings out of tolerance and correct scale factor if used | A1 |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

|  | Additional Guidance |  |
| :---: | :--- | :--- |
|  | For any correct reading the $\mathrm{m} / \mathrm{s}$ value and the $\mathrm{km} / \mathrm{h}$ value must be <br> 7equated; this can be implied by vertical/horizontal lines drawn on the graph |  |
|  | $25 \mathrm{~m} / \mathrm{s}=90 \mathrm{~km} / \mathrm{h}, 20 \mathrm{~m} / \mathrm{s}=72 \mathrm{~km} / \mathrm{h}, 15 \mathrm{~m} / \mathrm{s}=56 \mathrm{~km} / \mathrm{h}(2$ correct readings) <br> $90+72+56$ (correct build up but 56 is out of tolerance) <br> 218 | M 1 |
| $4 \mathrm{~m} / \mathrm{s}=15 \mathrm{~km} / \mathrm{h}$ (correct reading) <br> $15 \mathrm{~km} / \mathrm{h} \times 14$ (incorrect scale factor) <br> 210 | M 1 |  |
| A0 |  |  |

| $\mathbf{8 ( a )}$ | $40.5-18$ or 22.5 | M1 |  |
