Unit **A381/01**: Foundation Tier

General Certificate of Secondary Education

Mark Scheme for June 2014

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Annotations used in the detailed Mark Scheme.

Annotation	Meaning
	Blank Page – this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on each page of an additional object where there is no candidate response.
✓	Correct
✗	Incorrect
BOD	Benefit of doubt
FT	Follow through
ISW	Ignore subsequent working (after correct answer obtained), provided method has been completed
M0	Method mark awarded 0
M1	Method mark awarded 1
M2	Method mark awarded 2
A1	Accuracy mark awarded 1
B1	Independent mark awarded 1
B2	Independent mark awarded 2
MR	Misread
SC	Special case
^	Omission sign

These should be used whenever appropriate during your marking.

The **M**, **A**, **B**, etc annotations must be used on your standardisation scripts for responses that are not awarded either 0 or full marks.

It is vital that you annotate these scripts to show how the marks have been awarded.

It is not mandatory to use annotations for any other marking, though you may wish to use them in some circumstances.

Subject-Specific Marking Instructions

M marks are for using a correct method and are not lost for purely numerical errors.

A marks are for an accurate answer and depend on preceding **M** (method) marks. Therefore **M0 A1** cannot be awarded.

B marks are independent of **M** (method) marks and are for a correct final answer, a partially correct answer, or a correct intermediate stage.

SC marks are for special cases that are worthy of some credit.

Unless the answer and marks columns of the mark scheme specify **M** and **A** marks etc, or the mark scheme is 'banded', then if the correct answer is clearly given and is not from wrong working **full marks** should be awarded.

Do not award the marks if the answer was obtained from an incorrect method, ie incorrect working is seen and the correct answer clearly follows from it.

Where follow through (**FT**) is indicated in the mark scheme, marks can be awarded where the candidate's work follows correctly from a previous answer whether or not it was correct.

Figures or expressions that are being followed through are sometimes encompassed by single quotation marks after the word *their* for clarity, eg FT $180 \times (\textit{their} '37' + 16)$, or FT $300 - \sqrt{(\textit{their} '5^2 + 7^2')}$. Answers to part questions which are being followed through are indicated by eg FT $3 \times \textit{their}$ (a).

For questions with FT available you must ensure that you refer back to the relevant previous answer. You may find it easier to mark these questions candidate by candidate rather than question by question.

Where dependent (**dep**) marks are indicated in the mark scheme, you must check that the candidate has met all the criteria specified for the mark to be awarded.

The following abbreviations are commonly found in GCSE Mathematics mark schemes.

- i. **figs 237**, for example, means any answer with only these digits. You should ignore leading or trailing zeros and any decimal point eg 237000, 2.37, 2.370, 0.00237 would be acceptable but 23070 or 2374 would not.
- ii. **isw means ignore subsequent working (after correct answer obtained).**
- iii. **nfw means not from wrong working.**
- iv. **oe means or equivalent.**
- v. **Rot means rounded or truncated.**
- vi. **seen means that you should award the mark if that number/expression is seen anywhere in the answer space, including the answer line, even if it is not in the method leading to the final answer.**
- vii. **soi means seen or implied.**

Make no deductions for wrong work after an acceptable answer unless the mark scheme says otherwise, indicated for example by the instruction 'mark final answer'.

As a general principle, if two or more methods are offered, mark only the method that leads to the answer on the answer line. If two (or more) answers are offered, mark the poorer (poorest).

When the data of a question is consistently misread in such a way as not to alter the nature or difficulty of the question, please follow the candidate's work and allow follow through for **A** and **B** marks. Deduct 1 mark from any **A** or **B** marks earned and record this by using the MR annotation. **M** marks are not deducted for misreads.

Unless the question asks for an answer to a specific degree of accuracy, always mark at the greatest number of significant figures even if this is rounded or truncated on the answer line. For example, an answer in the mark scheme is 15.75, which is seen in the working. The candidate then rounds or truncates this to 15.8, 15 or 16 on the answer line. Allow full marks for the 15.75.

If the correct answer is seen in the body and the answer given in the answer space is a clear transcription error allow full marks unless the mark scheme says 'mark final answer' or 'cao'. Place the annotation ✓ next to the correct answer.

If the answer space is blank but the correct answer is seen in the body allow full marks. Place the annotation ✓ next to the correct answer.

Ranges of answers given in the mark scheme are always inclusive.

For methods not provided for in the mark scheme give as far as possible equivalent marks for equivalent work. If in doubt, consult your Team Leader.

Anything in the mark scheme which is in square brackets [...] is not required for the mark to be earned, but if present it must be correct.

Question			Answer	Marks	Part Marks and Guidance																													
1	(a)	(i)	4 [m]	1																														
		(ii)	30 to 40 [m]	1		Condone 95 feet to 130 feet, but feet/ft oe must be given

Question		Answer					Marks	Part Marks and Guidance		
2	(a)		Week	1st	2nd	3rd	4th	1		Both needed
			Number of acts	16	8	4	2			
	(b)	(i)	0.8 [million]					1		Condone 800 000 oe
		(ii)	(Week) 2 to (week) 3 oe					1	Allow 4.2 and 2.1 (both)	2 nd and 3 rd
		(iii)	No, viewers going down + 4.2 to 2.1 [million] or 2.1 to 0.8 [million]					1	<p>“No” + numbers from the table or based on a difference from the table. But do not allow just “figures went down” – question does demand numbers. However allow “dropped by half from 2nd to 3rd week”.</p>	<p>Must have at least one set of figures to support the “no”. If only last figure (0.8) given it must be qualified with “only” or an equivalent qualifier.</p>
	(c)		6 [shows]					2	M1 32 seen	

Question		Answer	Marks	Part Marks and Guidance	
	(d)*	Each audition takes about (2 to 20) minutes. So total time is (40 000 to 400 000). This is (28 to 280) days 24-hours a day, which is impossible.	3	<p>3 States auditions take (2 to 20) minutes, so total time is $(2 - 20) \times 20\,000$ minutes and compare with 5 weeks in same units which is impossible</p> <p>or</p> <p>2 States auditions take (2 to 20) minutes, so total time is $(2 - 20) \times 20\,000$ minutes or 571. ... auditions per day stated or calculating time per audition is w</p> <p>or</p> <p>1 States length of audition or how many auditions per week (4 000) or figs 571 or attempt to calculate time per audition or states (20 to 200) auditions per day (the equivalent of reasonable length of an audition)</p> <p>_____ special case _____</p> <p>Candidate mis-read and assume 20 000 in the show format (HAG)</p> <p>1 Evidence of at least two halving of 20 000 (at least 10 000 and 5 000)</p> <p>1 Showing/stating that 5 weeks only gets down to 625.</p>	For 12-hour day..... 47.58 auditions an hour 1.26 minutes per audition
3	(a)	F 2 [cm ²]	1 1	FT Strict follow through on first part	A=8, B=9, C=4, D=9, E= 6, G=3, H=4, I=3
	(b)	C H	1		Need both
	(c)	A E F	1		All three needed, if extras gain zero
	(d)	I G	1		Both needed, if extras gain zero

Question		Answer	Marks	Part Marks and Guidance	
	(e)	[r =] 60° [s =] 30° or r/2	1 1	FT	Following through on "r".
4	(a)	(i) 239 [metres]	1		
		(ii) D(haulagiri) and Man(aslu 1)	1	Condone obvious mis-spellings and 8163 , 8167	
		(iii) 90 [%]	1		
		(iv) All/10 of them + some working nfw	2	M1 no working and correct response or M1 for one correct conversion 5.5(3125) 5.3(81875) 5.3(6625) 5.3(225) 5.2(89375) 5.1(25625) 5.1(04375) 5.1(01875) 5.0(78125) 5.0(56875) or 8000 (m) seen	miles→metres or metres→miles
		(v) 29000 seems to nearest 1000 feet or 29002 is nearest foot oe	1	Words "rounded" or "estimate" used in a correct contex	See LIST after SSU
		(vi) 200 [years] nfw	2	M1 1000 or 0.005 seen used or figs 2 as answer	
	(b)	1400 to 1600 [metres] nfw	3	M1 For either of these seen 750 or 900 M1 For either of these seen 2500 or 1000	May be indicated on the pressure axis of the chart or cross on the graph line May be indicated on the height axis of the chart or cross on the graph line
	(c)	(i) 3540 nfw	2	M1 12 or "number" × 295 seen used in working or figs 354	
		(ii) 3500	1	FT from (i)	
	(d)	(i) Ja[nuary]	1		Condone -36
		(ii) 16 [°C or degrees or degrees C]	1		-16 gains no credit
	(e) ^c	(i) 21 or 10 ²¹	1	Seen as 10 ²¹	
		(ii) 4 [10 ⁴]	1	Seen as 10 ⁴	
		(iii) 10 [km]	2	B1 10 000 oe as answer	

Question		Answer	Marks	Part Marks and Guidance	
	(f) ^c	14	2	M1 for $\frac{800}{200}$ oe soi	e.g. 4 seen
5	(a)	(i)	30 21	1	Allow 29.5 to 30.0 20.7 to 21.2 Need both Condone in wrong order
		(ii)	0.295 to 0.3 0.207 to 0.212	1	Allow FT from part (i) Need both
	(b)*	Weight of 50.4 g, supported by an area of 0.063(m ²), 10 page booklet soi 0.63 x 80 soi	4	M1 Area of page (0.061 ... to 0.063...) or FT on 5(a)(ii) ("their length x their width") (process only seen sufficient) or (610 to 636) M1 "Area of page" x 10 (=Total area) soi M1 Total weight = "Total area" x 80 or B2 figs 488 to 508	0.61... to 0.63... 48.85 ... to 50.88 ... lff on 5(a)(ii) Working in cm This will cover candidates who assume 1 page booklet For candidates with magnified answer booklets follow through on the "real" dimensions of these.
